EDUCATION

Stony Brook University, B.S. in Information Systems *Expected May 2028*
Concentration: Technology Systems Management
Relevant Coursework: Data Structures, Database Design, Digital Logic Design, Systems Networks, Information Technology, Electrical and Computer Engineering
Leadership: Vice President External, Lambda Phi Epsilon

TECHNICAL SKILLS

Languages: Java, Python, TypeScript, JavaScript, SQL, C, C++, HTML/CSS
Frameworks & Libraries: Next.js, React, Node.js, Express.js, Prisma, Tailwind CSS, FastAPI, Chart.js
Tools & Platforms: PostgreSQL, Vercel, Git, Vitest, Playwright, Firebase, Wireshark
Concepts: REST APIs, OAuth 2.1, MCP Servers, AI/LLM Integration, Automated Testing, OOP, SSE Streaming

WORK EXPERIENCE

Amicus *Jun 2026 – Aug 2026*
AI Engineering Intern

- Contributed to an AI-powered case-management platform for personal injury law firms, where each case has a customizable workspace for documents, tasks, deadlines and notes
- Supported development of a case-level AI assistant built on Claude (Opus, Sonnet) and ChatGPT that answers questions from each case's documents and history
- Assisted with an LLM pipeline that matches incoming court filings, emails, calls and texts to the right case automatically

NYU Langone Hospital *Sep 2023 – Nov 2023*
Lab Assistant

- Processed, labeled, and tracked blood samples in compliance with hospital and regulatory protocols
- Maintained inventory of blood products and coordinated timely specimen delivery to support clinical staff
- Updated records in laboratory information systems, ensuring accuracy across patient and supply data

PROJECTS

NFLillion.com | Next.js, TypeScript, Tailwind CSS, SQLite, Fly.io *Nov 2026*

- Built and launched a free NFL trivia game where rarer correct answers to 25-second prompts earn bigger plays
- Grew the game to hundreds of daily users, with player scores and stats saved in the browser

Landed | Next.js, TypeScript, PostgreSQL, Prisma, Claude API, MCP *Oct 2026*

- Built a full-stack job tracker with a drag-and-drop Kanban board and event-sourced status history
- Built an MCP server with OAuth 2.1 so Claude and ChatGPT can read and update users' applications
- Used the Claude API to classify forwarded job emails and update applications automatically, with undo
- Wrote unit, integration, and Playwright E2E tests and added rate limiting and per-user data isolation

Loki Analyzer | Python, Streamlit, Claude API, PostgreSQL, OAuth *Sep 2026*

- Built a phone-first web app for ESPN fantasy football leagues with live matchups, lineup and waiver advice, and injury news
- Built a trade analyzer that blends ESPN and Sleeper projections with weekly trade values, then has Claude make the final call
- Built a tool-using AI chat assistant on the Anthropic Claude API
- Supported multiple users with Google sign-in, encrypted per-user settings and a PostgreSQL database

Personal Portfolio Website | HTML, CSS, JavaScript *May 2026*

- Designed and developed a responsive single-page portfolio website to showcase projects and experience
- Implemented scroll-triggered animations, a typewriter hero section, and a bento grid project layout
